

INTRODUCE

Road Maintenance Equipment One-Stop Service

Bitumen Distributor

Bitumen distributor is a piece of equipment related to asphalt road pavement construction. It can be used to transport and spray liquid bitumen (including hot bitumen, emulsified bitumen and modified bitumen, etc.), and is generally used in the construction of rural, urban roads, airports and port terminals. It is mainly used in the spraying of road permeable layer, waterproof layer and sticky layer bitumen. It can also supply bitumen to the loose and crushed soil on the spot, and it is used to build the stable soil base of bitumen pavement.

Chassis	DONGFENG /HOWO /JAC
Model	SLBS4000/6000/8000/10000/12000
Tank Capacity	4000L/6000L/8000L/10000L/12000L
Spraying width	200-4500mm(6000mm for optional)
Spray amount	0.2-2.2 kg/m2
Spraying accuracy	±1.5%
Spraying medium	Hot bitumen; emulsion bitumen;modified bitumen; diluted bitumen etc
Bitumen heating method	Diesel burner(Riello)
Control system	Manual/ Semi-intelligent/ Fully intelligent

SLBS4000

SLBS6000

SLBS8000

SLBS10000
